SPRING ANTIQUES IN SCHOHARIE

Schoharie Colonial Heritage Association is putting the last details together for this year's "Spring Antiques in Schoharie" antique show to be held on Saturday, April 11, 10-5 and Sunday April 12, 11-4 at the Schoharie Central School, 136 Academy Drive, Schoharie, NY. The show is moving back to the Schoharie Central School after the extensive renovations and everyone is excited. Visitors will see the newly constructed gymnasium in the Elementary Wing and the brand-new kitchen where we will be serving our homemade chili, mac and cheese, soups and salads plus our delicious desserts. The spacious dealer booths are a perfect backdrop for our many quality dealers to exhibit their treasures. You'll find country furniture, textiles, carpets, stoneware, vintage books, weathervanes, paintings, Native American items, art glass, jewelry, vintage silver, coins, vintage clothing, jewelry and everything in between. This spring show is a favorite for shoppers as well as the dealers who participate.

This antique show is run by our volunteers and is a major fund raiser to support our two museums — the Schoharie Valley Railroad Museum, and the 1743 Palatine House, both open weekends from May 'til October. The Children's Summer Theatre program is also supported by our antique shows.

Call show manager Ruth Anne Wilkinson with questions at 518-231-7241. There are still a few spaces available for dealers. Mark your calendars now for the weekend of April 11 and 12. We'll be anxious to see you! ➡

OUR STORY

Guidance you need, when you need it.

Straightforward advice. Genuine relationships.

Founded in 1991 and based in Oneonta, New York, our practice has grown from serving local families to supporting clients across the country. Our team takes a listening first approach, crafting strategies built around diversification, cost management, and tax efficiency.

We know our clients well, and have been doing this long enough to understand that the best financial plans should be the ones that fit real life.

Whether you're planning for retirement, managing a transition, or building long-term wealth, we help you see your options clearly and choose a path forward that makes sense.

CAR CARE

Charge up your car battery knowledge

Vehicles consist of many essential components to keep them running efficiently and effectively. Car and truck owners should have an understanding of how their vehicles function so they can diagnose and address problems as they arise.

Car batteries are an important component of any vehicle. Even though engines are the powerhouse of any car or truck, without a battery, the engine wouldn't be able to work. According to experts car batteries work by providing a jolt of electricity necessary to power all the electrical components of the vehicle. This is achieved through a chemical reaction that changes chemical energy into the electrical energy needed to deliver voltage to the starter. In addition to initially starting the car, the battery also keeps electric current steady to keep the engine running.

The battery also works in conjunction with the alternator to power the electronics in the car, according to the automotive information blog Autosessive. While the car is running, the alternator reverses the current produced by the battery, recharging it as a result. This happens during long journeys, so people who drive for short bursts of time may find that their batteries will not have a chance to recharge and may not have the longevity desired.

There is quite literally a lot riding on a functioning battery. No one wants to be caught stranded by a dead battery, so drivers may wonder if there are any indicators that may signal the battery needs replacement.

• **Slow turnover:** If a vehicle does not immediately start or if the cranking is sluggish and takes longer to start, it may mean the battery is starting to fail.

• **Frequent, short trips:** Drivers who make frequent, short trips may find their car batteries do not have time to fully recharge. This, coupled with overtaxing thanks to a lot of accessory use, may cause the battery and the alternator to have shortened life spans.

• **Low battery fluid levels:** If the fluid level is below the energy conductor inside, it is often indicative of overcharging and excessive heat.

- **Corrosion:** Corrosion buildup, dust, dirt, and grime on battery connections may cause performance problems. Inspecting and cleaning the terminals can prolong the battery life.
- **Odors and leaks:** Battery leaks can produce a sulfur odor similar to the smell of a rotten egg. This can become problematic over time, and leaks may indicate an aging or damaged battery.
- **Age:** Most batteries have a finite life span. A well-maintained battery can last up to five years. Neglect can reduce that life expectancy considerably.
- **Bloated or cracked battery case:** Replace the battery immediately if the case is cracking, as it could be because excessive heat is swelling the battery.

Understanding how car batteries work can help drivers keep their cars running smoothly. SC203721
