If only we cared as much about how well our eyes see.

The onset of eye disease may not be as visible as the appearance of new wrinkles. An eye doctor can spot the early warning signs of vision problems like glaucoma and macular degeneration, as well as other serious health conditions such as diabetes and hypertension. Early detection is key.

For men and women over 40, it might be wise to look into your eyes. For more information, visit [checkyearly.com](http://checkyearly.com). A public service message from Vision Council of America and AARP.
